

THREE-DIMENSIONAL WIRE HARNESS ASSEMBLY MODELS FROM THREE-DIMENSIONAL ZONE MODELS

ABSTRACT OF THE DISCLOSURE

5 Methods and computer-readable media for designing a wiring harness assembly are provided. Wiring data is automatically extracted from wiring harness installation models for a plurality of zones of the system. Wiring connections between the wiring harness installation models are reconciled. At least one wiring harness assembly model is automatically generated from the wiring harness data extracted from the wiring harness
10 installation models.
